PROFILE SUMMARY

Cyber Security student with strong foundations in networking, Linux, operating systems, VAPT, and SOC concepts. Familiar with security tools including Nmap, Wireshark, and Burp Suite for basic analysis and system evaluation. Eager to gain hands-on experience and contribute to strengthening cybersecurity operations.

TECHNICAL SKILLS

Programming (Python • SQL) | **Systems & Networking** (Networking Fundamentals • Linux Basics) | **Security Tools** (Nmap • Wireshark • Kali Linux) | **Web Technologies** (HTML • CSS(Basics)) | **Tools** (VS Code • GitHub)

EDUCATION

Sri Shakthi Institute of Engineering and Technology, 2023 – 2027 | Coimbatore
B.E in Computer Science and Engineering (Cybersecurity)
- CGPA: 8.29

Pathirakaliamman Matric Higher Secondary School, 2022 – 2023 | Madurai
Higher Secondary- State board
- Percentage: 87.66%

PROJECTS DONE

Python Based Web Honeypot for Attack Detection 12/2025 – 12/2025
- Improved a Flask-based web login honeypot to capture unauthorized access attempts and log attacker data into an SQLite database with monitoring dashboard.

Xenora- AI Smart Glasses for Visually Impaired 05/2025 – 08/2025
- Enhanced an AI-powered smart glasses system with real-time object detection and obstacle recognition using computer vision and sensor integration to enhance navigation safety.

Deep Learning Based Detecting Security System 01/2025 – 05/2025
- Developed a real-time face recognition security system using OpenCV to identify authorized users and trigger instant alerts for unauthorized access with 90% accuracy.

CERTIFICATIONS

DEVSPARK'25 - 24 Hrs Hackathon at KPR Institute of Engineering and Technology (2025) | **Cyber Security Job Simulation -TATA Forage** (2025) | **Advent of Cyber- TryHackMe** (2025)
